Medication in School Policy	
Date of review:	Marcg 2024
Prepared by:	Denise Clements/Sandra Cook
Approved by Governing Board:	May 2024
Policy based on:	WSSCC model policy
Date for next review:	

Statement of Intent

Section 100 of the Children and Families Act 2014 places a duty on 'governing bodies of maintained schools, proprietors of academies and management committees of PRUs to make arrangements for supporting pupils at their school with medical conditions'. The governing body of Imberhorne School will ensure that these arrangements fulfil their statutory duties and follow guidance outline in 'Supporting pupils at school with medical conditions' December 2015'.

Medicines will be administered to enable the inclusion of pupils with medical needs, promote regular attendance and minimise the impact on a pupil's ability to learn. In an emergency all teachers and other staff in charge of children have a common law duty of care to act for the health and safety of a child in their care – this might mean giving medicines or medical care.

Organisation

The governing body will develop policies and procedures to ensure the medical needs of pupils at Imberhorne School are managed appropriately. They will be supported with the implementation of these arrangements by the Head teacher and school staff.

The Lead for Managing Medicines at Imberhorne School is Sandra Cook who is based at Windmill Lane. She is assisted by Patricia Heron who is provides support on the Imberhorne Lane site. In their duties staff will be guided by their training, this policy and related procedures.

Implementation monitoring and review.

All staff, governors, parents/carers and members of the Imberhorne School community will be made aware of and have access to this policy. This policy will be reviewed biennially, with its implementation reviewed as part of the Head teacher's annual report to Governors.

Insurance

Staff who follow the procedures outlined in this policy and who undertake tasks detailed as 'cover available' in the RMP Medical Malpractice Treatment Table will be insured under the WSCC Public Liability insurance policy. The Treatment Table is included as appendix 1, along with the summary information on Medical Malpractice which is contained within the insurance cover provided.

In addition to this policy the Council also maintains a Medical Malpractice policy to incorporate insurance cover for the more invasive and complicated procedures that staff are now expected to undertake and that are not covered under a standard Public Liability policy.

Admissions

When the school is notified of the admission of any student, the Lead for Managing Medicines will seek parental consent to administer short term-ad-hoc non-prescriptions medication using [Medicines in School Parental Consent form](#) to administer short-term non-prescribed 'ad-hoc' medicines.' An assessment of the student's medical needs will be completed this might include the development of an [Individual Health Care Plans \(IHCP\)](#) or Education Health Care Plans (EHC) and require additional staff training. The school will endeavour to put arrangements in place to support that student as quickly as possible. However, the school may decide (based on risk assessment) to delay the admission of a student until sufficient arrangements can be put in place.

Students with medical needs

The school will follow Government guidance and develop an IHCP or EHC for pupils who:

- Have long term, complex or fluctuating conditions – these will be detailed using [Individual Health Care Plan Form B](#)
- Require medication in emergency situations – these will be detailed using [Individual Health Care Plan Form B](#) and [Medicines in School Parental Consent Form](#)

Parents/carers should provide the Headteacher with sufficient information about their child's medical condition and treatment, or special care needed at school. Arrangements can then be made, between the Parents/Carers, Headteacher, school nurse and other relevant health professionals to ensure that the student's medical needs are managed well during their time in school. Healthcare plans will be reviewed by the school annually or earlier if there is a change in a pupil's medical condition.

All prescribed and non-prescribed medication

On no account should a student come to school with medicine if he/she is unwell. Parents may call into the school and administer medicine to their child, or they may request that a member of school staff administers the medicine. If a student

refuses their medication, they should not be forced, the school will contact the parent/guardian and if necessary, the emergency services. Students should not bring any medication to school for self-administration.

The school will keep a small stock of paracetamol, and antihistamine, for administration with parental consent for symptoms that arise during the school day. All other medication must be supplied by the parent/carer in the original pharmacist's container clearly labelled and include details of possible side effects e.g. manufacturer's instructions and/or patient information leaflet (PIL).

Medicines must be delivered to the Medical Officer on site or at Reception with the [Medicines in School Parental Consent Form](#). The school will record all medication administered in school on the school's internal form [Imberhome School Record of Medicine administered at School](#) for prescribed and non-prescribed medication and after verbal consent from a Parent/Carer for school stock paracetamol or antihistamine.

Confidentiality

As required by the General Data Protection Act 2018, school staff should treat medical information confidentially. Staff will consult with the parent, or the student if appropriate, as to who else should have access to records and other information about the student's medical needs and this should be recorded on the IHCP or EHC. It is expected that staff with contact to a student with medical needs will as a minimum be informed of the student's condition and know how to respond in a medical emergency.

Consent to administer medication.

Parental/carer consent to administer medication will be required as follows:

- **Short term ad-hoc non-prescribed medication –**
The school will request parent/carer consent to administer ad-hoc non-prescription by either a [Medicines in School Parental Consent Form](#) when the student joins the school OR by contacting the parent/carer to gain consent at the time of administration and conversations will be recorded on the [Imberhome School Record of Medicine Administered at School](#) document. If the school is not informed of any changes by the parent/carer, it will be assumed that consent remains current.
- **Prescribed and non-prescribed medication taken regularly -** each request to administer medication must be accompanied by a [Medicines in School Parental Consent Form](#)

Prescription Medicines

Medicine should only be brought to school when it is essential to administer it during the school day. In most cases, doses of medicine can be arranged around the school day thus avoiding the need for medicine in school. Antibiotics for example are usually taken three times a day, so can be given with breakfast, on getting home from school and then at bedtime. Administration will be recorded using [Imberhome School Record of Medicine Administered at School](#).

Parents/Carers are expected to remove any remaining medicine from school once the prescribed course has been completed.

Non-prescription Medicines

Under exceptional circumstances where it is deemed that their administration is required to allow the student to remain in school, the school will administer non-prescription medicines. The school **will not** administer alternative treatments i.e. homeopathic or herbal potions, pills or tinctures or nutrition supplements unless prescribed or recommended by a doctor and detailed on an IHCP or EHC as part of a wider treatment protocol. As recommended by the Government in 'Supporting Pupils at School with Medical Conditions December 2015' the school will also not administer aspirin unless prescribed. The storage and administration for non-prescription medication will be treated as prescription medicines.

If the relevant symptoms develop during the school day as detailed under the paragraph below 'short term ad-hoc non-prescribed medication' the school will administer the following non-prescription medications:

- paracetamol (to pupils of all ages)
- ibuprofen (pupils age 12 and over), if brought in by Parent/carer
- antihistamine

All other non-prescription medications will only be administered by staff, providing:

- The parent/carer confirms daily the time the medication was last administered, and this is recorded on [Imberhome School Record of Medicine Administered at School](#)
- medication is licensed as suitable for the student's age.
- medication is suitable for the pupil i.e. if a child is asthmatic the medication is suitable for that condition.
- administration is required more than 3 to 4 times per day.
- medication is supplied by the parent or guardian in the original packaging with the manufacturer's instructions and/or (PIL).
- and accompanied by parental/carer consent [Medicines in School Parental Consent Form](#) and confirmation the medication has been administered previously without adverse effect.

The school will **NOT** administer non-prescription medication:

- as a preventative, i.e. in case the student develops symptoms during the school day.
- if the student is taking other prescribed or non-prescribed medication, i.e. only one non-prescription medication will be administered at a time.
- Any requirement for a non-prescription medication to be administered during school hours for longer than 48 hours must be accompanied by a doctor's note. In the absence of a doctor's note and if following the administration of a non-prescription medication symptoms have not begun to lessen in the first 48 hours the school will advise the parent to contact their doctor. If symptoms have begun to alleviate, the medication can continue to be administered at home out of school hours. Under very exceptional

circumstances where the continued administration of a non-prescribed medication is required to keep the student in school and this requirement has not been documented by a medical professional the school will continue to administer medication at their own discretion.

- A request to administer the same or a different non-prescription medication that is for the same/initial condition will not be repeated for 2 weeks after the initial episode; and not for more than 2 episodes per term - it will be assumed that the prolonged expression of symptoms requires medical intervention, and parents/carers will be advised to contact their doctor.
- Skin creams and lotions will only be administered in accordance with the Schools Intimate Care Policy and procedures.
- Medication that is sucked i.e. coughs sweets or lozenges, will not be administered by the school.
- if parents/carers have forgotten to administer non-prescription medication that is required before school – requests to administer will be at the discretion of the school and considered on an individual basis.

Short term ad-hoc non-prescribed medication

A small stock of standard paracetamol, and antihistamine will be kept by the school for administration if symptoms develop during the school day.

ONLY the following will be administered following the necessary procedures:

- For relief from pain
 - Standard Paracetamol will be administered in liquid or tablet form for the relief of pain i.e. period pain, migraine.
 - Standard Ibuprofen will ONLY be administered in tablet form to pupils aged 12 and over for period pain, migraine and muscle/skeletal disorders involving inflammation i.e. joint sprains, and only if supplied by Parents/Carer.
 - Ibuprofen will NOT be administered to any pupil diagnosed with asthma or under the age of 12.
- For mild allergic reaction – antihistamine (see Anaphylaxis) NB parental consent should be gained for those students known to require antihistamine as part of their IHCP. Verbal consent to administer for hay fever will be gained at the time of administration by contacting the parents and this will be recorded in writing. In an emergency medication can be administered with the consent of the emergency services.
- For travel sickness – medication will be administered if required before educational visits and must be age appropriate and supplied by the parent/carer in its original packaging with the PIL if available. Parental consent to administer is to be obtained as part of the educational or residential visit.

Only 1 dose of any of the above medications suitable to the weight and age of the student will be administered during the school day.

Pain relief protocol for the administration of paracetamol and ibuprofen

If a request for non-prescribed pain relief is made by a student or carer/staff (advocate for a non-verbal/non-communicating pupil) before 12pm:

- The school will contact the parent/carer and confirm that a dose of pain relief (Paracetamol) was NOT administered before school, parents/carers and if appropriate the student will also be asked if they have taken any other medication containing pain relief medication i.e. decongestants e.g. Sudafed, cold and flu remedies e.g. Lemsip and medication for cramps e.g. Feminax etc. and these conversations will be recorded. If a dose of pain relief has not been administered in the past 4 hours, the school will with parental consent administer 1 dose. The same advice applies to Ibuprofen brought into school with a supporting [Medicines in School Parental Consent Form](#).
- If the school cannot contact the parent/carer and therefore cannot confirm if pain relief (Paracetamol and Ibuprofen) was administered before school, then the school will refuse to administer pain relief.

If a dose of pain relief has been administered before school:

- PARACETAMOL - The school will not administer paracetamol until 4 hours have elapsed since the last dose (assume 8am) no more than 4 doses can be administered in 24 hours.
- IBUPROFEN - The school will **NOT** administer Ibuprofen at all during the school day if it has been administered at home before school.

If a request for pain relief is made after 12pm:

- The school will assume the recommended time between doses has elapsed and will with parental consent, administer 1 standard of dose of Paracetamol (or Ibuprofen that is in school with consent) without any need to confirm with the parent/guardian if a dose was administered before school, but if appropriate the pupil will still be asked if they have taken any other medication containing pain relief medication and this conversation will be recorded.

The school will inform the parent/carer if pain relief has been administered this will include the type of pain relief and time of administration.

Asthma

The school recognises that pupils with asthma always need access to relief medication. The school will manage asthma in school as outlined in the Asthma Toolkit. Students with asthma will be required to have an emergency inhaler and a spacer (if prescribed) in school. The school may ask the students parent or carer to provide a second inhaler. Parents are responsible for this medication being in date and the school will communicate with the parents if new medication is required and a record of these communications will be kept. The school inhaler will only be used in an emergency and will always be used with a spacer as outlined in the Asthma Toolkit. The school complies with the School Nursing Service recommendation that staff administering asthma inhalers are trained in their administration and that training is renewed annually. The school will develop IHCP's for those students with severe asthma and complete the Individual Protocol for students with mild asthma.

Anaphylaxis

Every effort will be made by the school to identify and reduce the potential hazards/ triggers that can cause an allergic reaction to students diagnosed with anaphylaxis within the school population. The school complies with the School Nursing Service recommendation that staff are trained in the administration of auto injectors and that training is renewed annually.

In accordance with the Medicines and Healthcare Products Regulatory Agency (MHRA) advice the school will ask parent/carer (s) to provide 2 auto-injectors for school use. Parents are responsible for this medication being in date and the school will communicate with the parents if new medication is required and a record of these communications will be kept.

Mild Allergic Reaction

Non-prescription antihistamine will with parental consent be administered for symptoms of mild allergic reaction (i.e. itchy eyes or skin, rash or/and redness of the skin or eyes), the student must be monitored for signs of further allergic reaction. If antihistamine is not part of an initial treatment plan, anaphylaxis medication will be administered following the guidance for short term ad-hoc non-prescribed medication.

Some antihistamine medication can cause drowsiness and therefore the school will consider if it is necessary for pupils to avoid any contact hazardous equipment after administration of the medication i.e. P.E. Science, Design and Technology.

Hay fever

Parent(s)/carer(s) will be expected to administer a dose of antihistamine to their child before school for the treatment of hay fever. The school will only administer antihistamine for symptoms of allergic reaction and not as a precautionary measure.

Severe Allergic Reaction

Where a GP/Consultant has recommended or prescribed antihistamine as an initial treatment for symptoms of allergic reaction this will be detailed on the pupils IHCP. The school will administer 1 standard dose of antihistamine (appropriate to

age and weight of the student) and it is very important that symptoms are monitored for signs of further allergic reaction. During this time students must NEVER be left alone and should be always observed.

If symptoms develop or there are any signs of anaphylaxis or if there is any doubt regarding symptoms, then if the student has been prescribed an adrenaline auto injector it will be administered without delay an ambulance called and the parents informed.

Medical Emergencies

In a medical emergency, first aid is given, an ambulance is called, and parents/carers are notified. Should an emergency situation occur to a student who has an IHCP or EHC, the emergency procedures detailed in the plan are followed, and a copy of the IHCP or EHC is given to the ambulance crew. If applicable the student's emergency medication will be administered by trained school staff, if the student's medication isn't available staff will administer the school's emergency medication with prior parental consent.

In accordance with amendments made to the Human Medicines Regulations 2012 from October 2014 an emergency supply of salbutamol inhaler(s) spacer(s) will be held by the school on each site. Parents are expected to provide 2 in date auto-injectors for administration to their child. The school will retain an emergency supply of in date auto-injectors on each site.

Parental consent to administer the school inhaler will be gained when the student's own inhaler is not available, and they are a known asthmatic. If an autoinjector is required and the students own is not available/ out of date and the student has a known anaphylaxis reaction, the autoinjector will be used and 999 contacted. If the student is having a severe reaction but is not known to have a severe reaction 999 is to be called and under the instruction of the emergency services, the school autoinjector is available to use.

The school will hold a register of the students diagnosed with asthma and/or anaphylaxis, and if parental consent has been given to administer the school medication. The school will be responsible for ensuring the school medication remains in date.

Instructions for calling an ambulance are displayed prominently by the telephone in the reception areas, medical rooms, pastoral offices and each department. [Imberhorne Lane First Aid Emergency Guidance/Windmill Lane First Aid Emergency Guidance](#)

Controlled Drugs

The school does not deem a student prescribed a controlled drug (as defined by the Misuse of Drugs Act 1971) as competent to carry the medication themselves whilst in school. Controlled drugs will be stored securely in a non-portable locked medicines cabinet in a locked room and only named staff will have access. The

drug will be handed to a member of the medical support team and a Parent/Carer will complete [Imberhorne Record of Controlled Medication administered to an individual child](#) form. Any student requiring midazolam will be supported by a member of staff who will sign the medication in and out of the medical room and carry this medication for the named student. The administration of a controlled drug will be witnessed by a second member of staff and records kept. In addition to the records required for the administration of any medication, a record will be kept of any doses used and the amount of controlled drug stock held in school.

Pupils taking their own medication.

- For certain long-term medical conditions, it is important for children to learn how to self-administer their medication. Appropriate arrangements for medication should be agreed and documented in the student's IHCP or EHC and parents should complete the self-administration section of [Medicines in School Parental Consent Form](#).

Storage and Access to Medicines

All medicines apart from emergency medicines (inhalers, adrenaline auto injector, midazolam etc.) will be kept securely (where access by students is restricted). Medicines are always stored in the original pharmacist's container. Students are told where their medication is stored and who holds the key and staff will be fully briefed on the procedures for obtaining their medication.

Emergency medicines such as inhalers, adrenaline auto injectors and midazolam must not be locked away. If appropriate certain emergency medication can be held by the student. The school will make an assessment as to the competency of each individual student to carry their own medication. Parents will be asked to supply a second adrenaline auto injector and/or asthma inhaler for each child and they will be kept in the school office. Staff must ensure that emergency medication is readily available at all times i.e. during outside P.E. lessons, educational visits and in the event of an unforeseen emergency like a fire.

Medicines that require refrigeration are kept in the medical room fridge to which student access is restricted and will be clearly labelled in an airtight container. There are specific arrangements in place for the storage of controlled drugs see page 7.

Waste medication

Where possible staff should take care to prepare medication correctly. If too much medication is drawn into a syringe the remainder (amount above the required dose) should be returned to the bottle before administration. If only a half tablet is administered the remainder should be returned to the bottle or packaging for future administration.

If a course of medication has been completed or medication is date expired, it will be returned to the parent/carer for disposal.

Spillages

A spill must be dealt with as quickly as possible, and staff are obliged to take responsibility/follow the guidelines. Spillages will be cleared up following the schools' procedures and considering the control of infection. Any spilled medication will be deemed unsuitable for administration and if necessary, parents will be asked to provide additional medication.

The school has additional procedures in place for the management of bodily fluids which are detailed in [Premises Bodily fluids risk assessment](#).

If the school holds any cytotoxic drugs, their management will be separately risk assessed and follow Health and Safety Executive (HSE) guidance.

Record Keeping – administration of medicines.

For legal reasons records of all medicines administered are kept at the school until the student reaches the age of 24. This includes medicines administered by staff during all educational or residential visits. The student's parent/ carer will also be informed if their child has been unwell during the school day and medication has been administered.

Recording Errors and Incidents

If for whatever reason, there is a mistake made in the administration of medication and the student is:

- Given the wrong medication.
- Given the wrong dose.
- Given medication at the wrong time (insufficient intervals between doses)
- Given medication that is out of date.
- Or the wrong pupil is given medication.

Incidents must be reported to the Schools Senior Leadership Team who will immediately inform the student's parent/carer. Details of the incident will be recorded locally as part of the schools local arrangements. Local records must include details of what happened, the date, who is responsible and any effect the mistake has caused. Senior Leadership will investigate the incident and change procedures to prevent reoccurrence if necessary. NB: Incidents that arise from medical conditions that are being well managed by the school do not need to be reported or recorded locally.

Staff Training

The school will ensure a sufficient number of staff complete Managing Medicines in Schools training before they can administer medication to students. The school will also ensure that other staff who may occasionally need to administer a medicine are instructed and guided in the procedures adopted by the school by the person who has completed the Managing Medicines course. Staff given instruction by the Lead for Medicines MUST complete a competency test and achieve a score of 100% in order to administer medication.

Supply and locum staff will be given appropriate instruction and guidance in order to support the pupils with medical needs in their care. All school staff are trained annually to administer an auto-injector and asthma inhaler in an emergency.

A record of all training must be maintained to show the date of training for each member of staff and when repeat or refresher training is required.

The school will ensure that the staff who administer medicine for specific chronic conditions are trained to administer those specific medicines, for example, Diabetes (insulin) Epilepsy (midazolam). Training in the administration of these specific medicines is arranged via the school nurse/hospital designated outreach training staff.

Educational Visits (Off - site one day)

Staff will administer prescription medicines to students when required during educational visits. Parents should ensure they complete a consent form [Medicines in School Parental Consent Form](#) and supply a sufficient amount of medication in its pharmacist's container. Non-prescription medicines as detailed in this policy can be administered by staff, students must not carry non-prescription medication for self-administration.

All staff will be briefed about any emergency procedures needed with reference to students where needs are known, and copies of care plans will be taken by the responsible person.

Residential Visits (overnight stays)

The school acknowledges the common law 'duty of care' to act like any prudent parent. This extends to the administration of medicines and taking action in an emergency, according to the care plan.

Occasionally it may be necessary to administer non-prescription medicines as described in this policy i.e. antihistamine to students suffering from an allergic reaction or paracetamol for acute pain from things like headache, period pain, toothache etc. Parents must give written consent prior to the residential visit and sign to confirm that they have administered the medication without adverse effect using the [Medication on Residential School Visit trip](#).

The school will keep its own supply of the following non-prescription medication paracetamol, sore throat sweets, antihistamine, ibuprofen for administration to students during a residential visit and parental consent will be required in order for the school to administer their supply. The medication will be stored, and administration recorded as for prescription medicines. Students should not bring non-prescribed medication on the residential visit for self-administration.

Risk assessing medicines management on all off-site visits.

Students with medical needs shall be included in visits as far as this is reasonably practicable. School staff will discuss any issues with parents and/or health professionals so that extra measures (if appropriate) can be put in place. A copy

of the students IHCP or EHP will be taken on the visit and detail arrangements relating to the management of their medication(s) during the visit should be included in the plan.

If a student requires prescribed or non-prescribed medication during visit and an IHCP or EHP has not been developed and the management of their medication differs from procedures followed whilst in school, the school will conduct a risk assessment and record their findings.

Travelling abroad – a risk assessment will be developed considering parental and medical advice and documented on the students IHCP or EHP. If an IHCP or EHP has not been developed, the school will record their findings. Best practice would be to translate these documents to the language of the country being visited. The international emergency number should be on the care plan (112 is the EU number). Global Health Insurance Cards (GHIC) should be applied for by parents and supplied to the school prior to travel for all pupils that travel abroad.

The results of risk assessments however they are recorded i.e. IHCP, EHP etc. will be communicated to the relevant staff and records kept of this communication.

Complaints

Issues arising from the medical treatment of a student's whilst in school should in the first instance be directed to the Headteacher. If the issue cannot easily be resolved the Head teacher will inform the governing body who will seek resolution.

Appendices

1. RMP Medical malpractice treatment table and insurance information
2. Medicines in School Parental Consent form
3. Imberhorne School Record of Medicine Administered at School
4. Individual Health Care Plan Form B (IHCP)
5. Imberhorne Record of Controlled Medication administered to an individual child
6. Medication on Residential School Visit trip
7. Asthma

Process for developing and Individual Health Care Plan (IHCP)

Student diagnosed or due to attend as a new student

Parent/carer or Healthcare professional informs school

Head teacher coordinates meeting to agree IHCP or delegates this to a senior member of staff or staff member named in medical conditions policy

Meeting to agree IHCP to include student, parent, specialist nurse, school nurse and GP or Paediatrician (where available, if not a letter from GP/consultant), key school staff

Develop the IHCP and obtain signatures from relevant parties

Specialist nurse delivers/school nurse delivers training and staff signed-off as competent if required

IHCP implemented and circulated to all relevant staff

IHCP reviewed annually or when the condition changes.
Parent or Healthcare professional to initiate.

RMP Medical malpractice treatment table

Medical Malpractice
Table.pdf

Medical Malpractice: Policy Number 046249/01/2023/0041 (QBE)

The County Council purchases medical malpractice insurance which indemnifies the County Council against legal liability to pay compensatory damages or awards to third parties with a sum insured of £5m, a £750,000 excess applies.

It is understood that it is not always possible for a health professional to visit schools to undertake medical procedures and, in such circumstances, parents will look to and request the school to assist. Previously our Public Liability policy covered certain procedures but did not include invasive treatments or procedures. Due to the increase in the demands on our employees, volunteers and foster carers to perform more complex and invasive treatment procedures it is necessary for us to purchase medical malpractice insurance.

The County Council will support the school providing all reasonable and appropriate measures have been put in place to safeguard both the pupil and the school.

The following conditions apply to this policy when in a school setting:

- Each child who receives a medical procedure or intervention has a specific individual healthcare plan, signed off by the child's parents, the head teacher and the child's GP or supervising consultant.
- The care plan must include full details of the emergency procedures in the event of a medical emergency.
- The child's parents have provided written consent for a non-medical or healthcare practitioner to provide the medical procedure or intervention to their child.
- The employee who is providing the medical procedure or intervention has received full training from a registered medical or healthcare professional and has been signed off as fully competent in the procedure they are providing.
- The employee who is providing the medical procedure or intervention has provided written confirmation that they have read and understood the individual care plan.

Sharon Andrews in the WSCC Insurance Team should be contacted, as soon as possible, if an incident occurs that may result in an insurance claim.

Consent to administer non-prescribed medication on a residential visit

The school will not administer medication unless this form is completed and signed. This information will be kept securely with your child's other records. Whilst away if your child feels unwell the school staff may wish to administer the appropriate non-prescription. Please do not hesitate to contact the school if there are any issues you wish to discuss.

Student Name	D.O.B
Gender	Year/Tutor Group

If your child develops the relevant symptoms during the residential visit, with your consent they will be given a standard dose suitable to their age and weight of the appropriate non-prescribed medication. If symptoms persist medical advice will be sought and if necessary, the emergency services called. You will be informed when the school has administered medication on our return by email/verbal conversation with trip leader.

The school will hold a small stock of the following medicines:

- | | |
|---|--------------------------------|
| <input type="checkbox"/> Paracetamol brand | <input type="checkbox"/> |
| <input type="checkbox"/> Ibuprofen (Student's age 12+) brand..... | <input type="checkbox"/> |
| <input type="checkbox"/> Antihistamine brand | <input type="checkbox"/> |

Please tick the non-prescription medications that you give your consent for the school to administer using their stock during the residential visit.

If you would like your child to be given travel sickness medication, please supply medication suitable for their age and weight in its original packaging with the patient information leaflet

- Travel sickness**

I give my consent for the medications ticked above to be administered by the school from their stock and confirm I have administered them to my child in the past without adverse effect.

Date

Asthma

The school:

- Recognises that asthma is a widespread, serious but controllable condition and the school welcomes all students with asthma
- Ensures that students with asthma can and do participate fully in all aspects of school life, including art, PE, science, educational visits and out of hours activities
- Recognises that students with asthma need immediate access to reliever inhalers at all times
- Keeps a record of all students with asthma and the medicines they take
- Endeavours that the whole school environment, including the physical, social, sporting and educational environment, is favourable to students with asthma
- Ensures that all staff (including supply teachers and support staff) who have students with asthma in their care, know who those students are and know the school's procedure to follow in the event of an asthma attack

Asthma medicines

Immediate access to reliever medicines is essential. Students are expected to carry their own inhalers with them.

It is advised that the school is provided with a labelled spare and in date reliever inhaler. These are held in case the student's own inhaler runs out or is lost or forgotten and are kept in the [school office/first aid room]. All inhalers must be labelled with the child's name.

Unless a medication form is submitted to the school advising a confirmed diagnosis of Asthma from a medical professional, First Aiders at the school cannot administer emergency Ventolin and will, instead, call an ambulance.

If the parent/carer has stated that their son/daughter requires an inhaler in school but does not supply an in-date inhaler, the school will take the following action

- Informs the student that they do not have an in-date inhaler at school
- Phone the parent/carer and request that an inhaler is brought into school without delay.
- If the parent/carer fails to supply the inhaler as requested, write to the parent using the example letter. This repeats the request for the inhaler and states that without an inhaler, in the event of an asthma attack, staff will be unable to follow the usual Asthma Emergency inhaler procedures and will be reliant on calling 999 and awaiting the Emergency Services. The letter will be filed with the child's asthma information form.
- School staff who agree to administer medicines are insured by the local authority when acting in agreement with this policy. All school staff will let students take their own medicines when they need to.

For information on how to clean inhalers please go to www.asthma4children

Record keeping

When a child joins the school, parents/carers are asked to declare any medical conditions (including asthma) that require care within school, for the school's records using Form 3A.

At the beginning of each school year, parents are requested to update details about medical conditions (including asthma) and emergency contact numbers.

From this information the school keeps its asthma records. All teachers know which students in their classes have asthma. Parents are required to update the school about any change in their son's/daughter's medication or treatment.

Exercise and activity - PE and games

All students are encouraged to participate fully in all aspects of school life including PE. PE staff are aware of those students with asthma. Students are encouraged/remembered to use their inhalers before exercise (if instructed by the parent/carer on the asthma form) and during exercise if needed. Staff are aware of the importance of thorough warm up and down. Each student's inhaler will be labelled and kept in a box at the site of the lesson.

School Environment

The school endeavours to ensure that the school environment is favourable to students with asthma. The school will take into consideration, any particular triggers to an asthma attack that an individual may have and will seek to minimise the possibility of exposure to these triggers.

Asthma Attacks – School's Procedure

In the event of an asthma attack, staff will follow the school procedure:

- Encourage the student to use their inhaler
- Summon a first aider who will bring the student's Asthma Information Form and will ensure that the inhaler is used according to the dosage on the form
- If the student's condition does not improve or worsens, the First Aider will follow the 'Emergency asthma treatment' procedures
- The First Aider will call for an ambulance if there is no improvement in the student's condition
- If there is any doubt about a student's condition an ambulance will be called

Access and Review of Policy

The Policy will be accessible to all staff and the community through the school's website. Hard copies can be obtained from the school office.

Emergency asthma treatment

Asthma attacks & wheeziness

Signs of worsening asthma:

- Not responding to reliever medication
 - Breathing faster than usual
 - Difficulty speaking in sentences
 - Difficulty walking/lethargy
 - Pale or blue tinge to lips/around the mouth
 - Appears distressed or exhausted
-
- Give **6 puffs of the blue inhaler via a spacer**
 - Reassess after 5 minutes
 - If the student still feels wheezy or appears to be breathless they should have a further **4 puffs of the blue inhaler**
 - Reassess after 5 minutes
 - **If their symptoms are not relieved with 10 puffs of blue inhaler then this should be viewed as a serious attack:**

- **CALL AN AMBULANCE and CALL PARENT**
- **While waiting for an ambulance continue to give 10 puffs of the reliever inhaler every few minutes**

Asthma Toolkit

What is asthma?

Asthma is a condition that affects the small tubes (airways) that carry air in and out of the lungs. When a person with asthma comes into contact with something that irritates their airways (an asthma trigger), the muscles around the walls of the airways tighten so that the airways become narrower and the lining becomes inflamed and starts to swell. Sometimes, sticky mucus or phlegm builds up, which can further narrow the airways. These reactions cause the airways to become narrower and irritated - making it difficult to breathe and leading to symptoms of asthma. Triggers can include, hot or cold weather, increased humidity, fumes, powders, physical exercise and stress.

It's difficult to say for sure what causes asthma however you're more likely to develop asthma if you have a family history of asthma, eczema or allergies. It's likely that this family history, combined with certain environmental factors, influences whether or not someone develops asthma.

Asthma is a widespread, serious but controllable condition, and schools should ensure that Students can and do participate fully in all aspects of school life. Students with asthma need immediate access to reliever inhalers and in an emergency, a spacer.

The school should ensure that all staff (including supply teachers and support staff) who have Students with asthma in their care, know who those Students are and know the school's procedure to follow in the event of an asthma attack.

Symptoms of asthma

The usual symptoms of asthma are:

- coughing
- wheezing
- shortness of breath
- tightness in the chest.

Not everyone will get all of these symptoms. Some people experience them from time to time; a few people may experience these symptoms all the time and occasionally some may not experience any symptoms.

Asthma medicines

Immediate access to reliever medicines is essential. Students with asthma are encouraged to carry their reliever inhaler as soon as the parent/carer, doctor/asthma nurse and class teacher agree they are mature enough. Those deemed competent to do so may self-administer their asthma medication. The reliever inhalers of younger children should be kept in the classroom.

It is advised that the school has an in date spare reliever inhaler on site. These are held in case the student's own inhaler runs out, or is lost or forgotten and are kept in the [school office/first aid room]. The school may ask a student's parent or carer to provide a second inhaler. All inhalers must be labelled with the child's name by the parent/carer.

From October 1st 2014 following changes to the Human Medicines Regulations 2012 schools will be able to purchase inhalers for emergency use from their local pharmacist provided it is done on an occasional basis and not for profit schools. It is recommended that schools keep a small stock of back-up inhalers for emergency use. Schools wishing to purchase inhalers should put their request in writing on headed paper signed by the principal or head teacher stating:

- The name of the school for which the product is required
- The purpose for which that product is required
- The total quantity required

It is recommended that emergency asthma medication is delivered via a spacer device and schools should ensure they have a spacer on site. Spacers may not be shared therefore once used a spacer should be allocated to the student that used it and a new one purchased. Spacers can be purchased from a local pharmacist. It is the school's responsibility to ensure the school inhaler remains in date. Spacers provided by students for their own individual use should be cleaned between uses. Wash spacer in warm soapy water, rinse with clean running water and leave to dry naturally.

School staff who agree to administer medicines are insured by the local authority when acting in agreement with this policy. All school staff will facilitate Students to take their medicines when they need to.

Record Keeping

When a child joins the school, parents/carers are asked to declare any medical conditions (including asthma) that require care within school, for the school's records. At the beginning of each school year, parents are requested to update details about medical conditions (including asthma) and emergency contact numbers.

All parents/carers of children with asthma are given an asthma information form to complete and return to school. From this information the school keeps its asthma records. All teachers know which children in their class have asthma. Parents are required to update the school about any change in their child's medication or treatment. Records must be kept for the administration of asthma medication as for any other prescribed medication.

Schools must gain consent from a parent/guardian to administer the school's emergency inhaler and a register must be kept with the inhaler that details which parents/guardians have given permission for the school inhaler to be administered. It is the responsibility of the school to keep the register up to date.

Exercise and activity - PE and games

All children are encouraged to participate fully in all aspects of school life including PE. Children are encouraged/reminded to use their inhalers before exercise (if instructed by the parent/carer on the asthma form) and during exercise if needed. Staffs are fully aware of the importance of thorough warm up and cool down. Each student's inhaler will be labelled and kept in a box at the site of the lesson.

School Environment

It is recommended that schools endeavour to ensure that the school environment is favourable to students with asthma. The school will need to take into consideration, any particular triggers to an asthma attack that an individual may have and seek to minimise the possibility of exposure to these triggers.

Training

It is best practice that all school staff are trained to recognise the symptoms of worsening asthma, how to respond in an emergency and how to administer of reliever medication (inhaler).

Asthma Attacks – School's Procedure

In the event of an asthma attack, staff will follow the school procedure:

- Encourage the student to use their inhaler
- Summon a first aider who will bring the student's Asthma Information Form and will ensure that the inhaler is used according to the dosage on the form

- If the student's condition does not improve or worsens, the First Aider will follow the 'Emergency asthma treatment' procedures
- The First Aider will call for an ambulance if there is no improvement in the student's condition
- If there is any doubt about a student's condition an ambulance will be called

Mild Symptoms:

- Cough
- Feeling of 'tight chest'
- Wheeze

Ensure that the student has access to their reliever (blue inhaler)

- Sit the student down in a quiet place if possible
- Younger students or those using 'puffer' style inhalers should use a spacer
- Allow the student to take 2 or 4 puffs of the inhaler
- Assess effect and if fully recovered, the child may rejoin usual activities

Moderate Symptoms:

- Increased cough and wheeze
- Mild degree of shortness of breath but able to speak in sentences
- Feeling of 'tight chest'
- Breathing a little faster than usual
- Recurrence of symptoms / inadequate response to previous 'puffs'

Ensure that the student has access to their reliever (blue inhaler)

- Sit the student down in a quiet place if possible and loosen any tight clothing around their neck
- Younger students or those using 'puffer' style inhalers should use a spacer
- Allow the student to take 4 or 6 puffs of the inhaler
- Assess effect, if fully recovered the student may re-join activities but a parent/carer should be informed

Severe symptoms:

- Not responding to reliever medication
- Breathing faster than usual
- Difficulty speaking in sentences
- Difficulty walking/lethargy
- Pale or blue tinge to lips/around the mouth
- Appears distressed or exhausted

Ensure that the student has access to their reliever (blue inhaler)

- Sit the student down in a quiet place if possible and loosen any tight clothing around their neck
- Younger students or those using 'puffer' style inhalers should use a spacer
- Allow the student to take 6 puffs of the blue inhaler
- Assess effect, If the child still feels wheezy or appears to be breathless they should have a further 4 puffs of the blue inhaler

Reassess:

- If symptoms are not relieved with 10 puffs of blue inhaler then this should be viewed as a serious attack:
- CALL AN AMBULANCE and CALL PARENT
- While waiting for an ambulance continue to give 10 puffs of the reliever inhaler every 5 minutes
